

MAD COW INTERNAL REPORT

MAD COW 8-Game Pro Coach Report

八场比赛综合版 + Kings 新视频 + Score Sheet 数据复核 + 中英双语

Direct, objective, team-growth focused. / 直接、客观、为球队进步服务。

0. 数据说明

Data Notes

本报告把 8 场比赛的视频趋势和记分表结合。得分以记分表为主，因为 2/3/1 的得分记录最清楚；视频用于判断失误、投篮选择、防守沟通、角色适配和回合质量。

This report combines video tendencies with the 8 score sheets. Points are based mainly on the score sheets because the 2/3/1 scoring marks are the clearest; video is used for turnovers, shot selection, defensive communication, role fit, and possession quality.

记分表里 2 代表两分，3 代表三分，1 代表罚球。每场个人得分已经和球队总分交叉核对。少数笔迹不清的地方以球队总分为校准。

On the score sheets, 2 = two-point make, 3 = three-point make, and 1 = free throw. Individual scoring has been cross-checked against team final scores. A few unclear marks were reconciled against the team total.

篮板、助攻、抢断、盖帽的记录质量不如得分。部分记分员会漏记助攻，也会把篮板/抢断/盖帽记得不完整。因此这些数据在报告里作为“趋势参考”，不是官方最终统计。

Rebounds, assists, steals, and blocks are less reliable than scoring. Some scorekeepers under-record assists and may miss rebounds, steals, or blocks. These categories are treated as trend references, not official final statistics.

投丢、失误、命中率不在这些记分表里，所以不能凭表格做官方 FG%、3P%、TO%。报告中的失误和效率评价来自视频趋势，不是官方逐回合统计。

Misses, turnovers, and shooting percentages are not on these sheets, so official FG%, 3P%, and TO% cannot be calculated from them. Turnover and efficiency comments are video tendency judgments, not official possession-by-possession tracking.

1. Score Sheet 可信度分析

Score Sheet Reliability

Category 类别	Reliability 可信度	Reason 原因
得分 / Points	高 / High	2、3、1 的记录清晰，且能和最终比分核对。 2/3/1 marks are clear and cross-check with final scores.
三分命中 / Made threes	中高 / Medium-high	3 分标记较清楚，但个别笔迹有歧义。 Made-three marks are mostly readable, with a few handwriting ambiguities.
篮板 / Rebounds	中 / Medium	能看出趋势，但不同记分员尺度不稳定。 Trends are visible, but scorekeeper consistency varies.
助攻 / Assists	偏低 / Likely undercounted	很多二次传导和快攻助攻可能漏记。 Many extra-pass and transition assists may be missed.
抢断/盖帽 / Steals/Blocks	中低 / Medium-low	需要视频复核，表格只能做方向参考。 Need film verification; sheets are directional only.
失误/投丢 / TO/Misses	无 / Not tracked	不能从表格直接计算。 Cannot be calculated directly from the sheets.

最重要的结论：得分和三分可以较可靠地用于球员评价；篮板/助攻/抢断/盖帽可以用于趋势判断；失误和命中率必须看视频。

Main conclusion: scoring and made threes are reliable enough for evaluation; rebounds/assists/steals/blocks are trend indicators; turnovers and shooting efficiency must come from film.

2. 八场比赛结果

Eight-Game Results

8 场记分表合计：MAD COW 战绩 6-2，总得分 464，场均 58.0；总失分 414，场均失分 51.8。
Across the 8 score sheets: MAD COW record 6-2, 464 total points, 58.0 PPG; 414 points allowed, 51.8 opponent PPG.

Game 比赛	Result 结果	Score 比分	Leading scorer 队内最高分	Pts 分数	Coach note 教练观察
vs Pirates	L	47-49	Yang #23	19	两分惜败，进攻过度集中，后段回合质量不够。 Two-point loss; scoring was too concentrated and late possession quality was not good enough.
vs Spartans	W	53-47	Akila #69/#88	16	低中节奏赢球，Akila 得分和多人补充分数帮助球队稳定。 A controlled win; Akila scoring and balanced support stabilized the team.
vs Kings	W	80-68	Akila #69/#88, Willy #26	20	8 场里最强进攻样本之一，三分、中投、冲板都有体现。 One of the strongest offensive games in the sample, with threes, midrange, and crashing all showing up.
vs Eagles	L	55-66	Akila #69/#88	18	进攻并非完全崩盘，但防守和回防被打穿，失分过高。 The offense did not fully collapse, but defense and transition recovery were punished; points allowed were too high.
vs Generals	W	47-43	Yang #23	15	低比分硬仗，靠防守和少数稳定得分点拿下。 Low-scoring grind; won through defense and a few stable scoring sources.
vs Tigers	W	50-41	Akila #69/#88	19	防守限制效果不错，进攻靠 Akila/Yang/Willy 维持。 Good defensive containment; offense was carried mainly by Akila/Yang/Willy.
vs Wolves	W	71-46	Akila #69/#88	25	净胜最大样本，Akila/Yang 的高产出直接拉开比赛。 Largest-margin sample; high production from Akila/Yang separated the game.
vs Cardinals	W	61-54	Willy #26	18	Willy 和 Sean 得分撑住比赛，Yang 低分时仍有牵制力。 Willy and Sean carried scoring; even with low points, Yang still created gravity.

3. 更新版队内 Box Score

Updated Team Box Score

这个表是“记分表版”队内统计。得分和三分最值得信任；篮板助攻抢断盖帽是记录范围，不是官方赛季数据。
This is the score-sheet version of the internal box score. Points and made threes are the most trustworthy; rebounds, assists, steals, and blocks are recorded ranges, not official season totals.

Player 球员	PTS 总分	PPG 场均	High 最高	Low 最低	Vol. 波动	3PM 三分	PTS% 得分占比	REB rec. 篮板	AST rec. 助攻	STL rec. 抢断	BLK rec. 盖帽
Akila #69/#88	119	14.9	25	4	6.7	1	25.6%	45-50	15-20	10-14	1-2
Yang #23	108	13.5	19	6	4.2	23	23.3%	40-45	15-20	8-12	1-2
Willy #26	93	11.6	20	5	4.8	24	20.0%	18-24	10-14	8-12	0-1
Sean #1	70	8.8	17	2	4.1	8	15.1%	30-38	8-12	6-10	2-3
Eaxin #3	35	4.4	10	2	2.5	2	7.5%	18-24	4-8	6-10	0-1
James #25	23	2.9	9	0	3.1	0	5.0%	18-24	8-12	3-6	1-2
Chris #16	10	1.2	4	0	1.5	0	2.2%	15-22	5-9	4-8	0-1
Tiger #11	6	0.8	2	0	1.0	0	1.3%	12-20	5-9	2-5	0

4. 每场个人得分

Points by Game

Player 球员	Pirates	Spartans	Kings	Eagles	Generals	Tigers	Wolves	Cardinals	Total 总分	PPG 场均	3PM 三分
Akila #69/#88	4	16	20	18	8	19	25	9	119	14.9	1
Yang #23	19	11	16	11	15	11	19	6	108	13.5	23
Willy #26	5	11	20	13	10	8	8	18	93	11.6	24
Sean #1	9	7	10	6	8	2	11	17	70	8.8	8
Eaxin #3	4	4	10	2	6	5	2	2	35	4.4	2
James #25	2	0	2	0	0	4	6	9	23	2.9	0
Chris #16	2	4	0	3	0	1	0	0	10	1.2	0
Tiger #11	2	0	2	2	0	0	0	0	6	0.8	0

得分主要集中在 Akila、Yang、Willy、Sean 四人身上，四人合计约占全队总分 84%。这说明球队有明确火力点，但也说明非核心得分手必须用防守、篮板、切入、中投和少失误来提供价值。

Scoring is concentrated in Akila, Yang, Willy, and Sean, who combine for about 84% of team points. This shows clear firepower, but it also means non-core scorers must add value through defense, rebounding, cutting, midrange, and low turnovers.

5. 得分图表

Scoring Charts

8 场总得分
Total points from the eight score sheets

8 场场均得分
PPG from the eight score sheets

6. 三分和球队得分趋势

Three-Point and Team Score Trends

三分命中记录：Willy 与 Yang 是球队主要外线牵制来源
Recorded made threes: Willy and Yang are the main spacing sources

球队每场得分与对手得分
Team score versus opponent score by game

7. 得分占比分析

Scoring Share Analysis

8 场得分占比
Scoring share across the eight games

Akila 总得分第一，Yang 第二，Willy 第三，Sean 第四。这个结构说明球队不是只有一个得分点，但也说明球权和角色必须更清楚，否则高 usage 球员的失误会被放大。

Akila is first in total scoring, Yang second, Willy third, and Sean fourth. This means the team is not one-dimensional, but ball usage and roles must be clearer because high-usage turnovers become magnified.

8. 比赛整体总结

Overall Team Summary

综合 8 场，球队整体不是“没能力”，而是“能够但回合质量不稳定”。赢球时能打出转换、三分、中投、冲板和团队分享；输球或被追分时，问题通常是持球过久、传球太慢、回防慢、换防不喊。

Across 8 games, the issue is not lack of ability; it is unstable possession quality. In wins, the team shows transition, threes, midrange, crashing, and ball sharing. In losses or blown stretches, the problems are over-dribbling, slow passing, slow transition defense, and silent switches.

比赛节奏偏中快。最好的得分方式不是纯单打，而是先由 Yang/Akila/Sean 攻击，吸引防守后给 Willy 三分、James/Eaxin 中投、Akila/Chris 冲板或切入。

The pace is medium-fast. The best scoring method is not pure isolation; it is attack first from Yang/Akila/Sean, then create Willy threes, James/Eaxin midrange, and Akila/Chris crashes or cuts.

最大优点是球队有多种进攻来源。最大问题是很多失误不是对手逼出来的，而是自己慢、软、犹豫、乱运、乱传。

The biggest strength is multiple offensive sources. The biggest weakness is that many turnovers are not forced by great defense; they come from being slow, soft, hesitant, loose with the dribble, or careless with passes.

9. 球队优点分析

Team Strengths

第一，三分牵制力真实存在。Yang #23 和 Willy #26 合计约 47 个三分命中，防守必须尊重他们，这会给队友切入和冲板创造空间。

First, three-point gravity is real. Yang #23 and Willy #26 combine for about 47 recorded made threes, so defenses must respect them; that creates space for cuts and offensive rebounding.

第二，Akila 的进攻篮板和二次进攻给球队增加了额外回合。这个价值不能只用命中率看，也不能只用失误否定。

Second, Akila's offensive rebounding and second-chance scoring create extra possessions. This value cannot be judged only by shooting percentage and cannot be erased only by turnovers.

第三，James 和 Eaxin 都有中投价值。对手收缩禁区时，肘区和罚球线附近的中投可以成为稳定出口。

Third, James and Eaxin both have midrange value. When defenses collapse into the paint, elbow and free-throw-line midrange shots can become stable outlets.

第四，球队在跑起来时得分效率明显更好。转换中 Yang 的推进、Willy 的外线跟进、Akila 的二次冲抢都能造成压力。

Fourth, the team is clearly better when it runs. In transition, Yang's push, Willy's perimeter trail, and Akila's second-effort crashing all create pressure.

第五，阵容功能其实很完整：有攻击点、有 shooter、有中投、有内线、有冲板、有切入。问题不是没有拼图，而是拼图经常被摆错。

Fifth, the roster functions are actually complete: attackers, shooters, midrange, bigs, crashing, and cutting. The problem is not missing pieces; it is pieces being used incorrectly.

10. 球队缺点分析

Team Weaknesses

第一，失误质量差。Sean 被断、Akila 处理球冒险、Tiger 无谓失误，这些不是小问题，因为它们直接变成对方快攻。

First, turnover quality is poor. Sean getting stripped, Akila making risky decisions, and Tiger committing unnecessary turnovers are not small issues because they directly become opponent fast breaks.

第二，spacing 经常被自己破坏。Willy 是 shooter，应该站外线拉开；Chris 不是 shooter，应该切入和补位；James/Eaxin 要在中投接应点，不要都挤到篮下。

Second, spacing is often self-damaged. Willy is the shooter and should stretch outside; Chris is not a shooter and should cut/fill; James/Eaxin should be midrange outlets, not all crowd the paint.

第三，篮下终结不稳定。Tiger 的篮下放枪和 Akila 的上篮波动，会让球队失去本该拿下的 easy points。

Third, close finishing is unstable. Tiger's missed close finishes and Akila's layup inconsistency cost the team easy points that should be automatic.

第四，防守沟通不足。挡拆时没有提前喊 screen/switch/stay，导致两个人守一个人，或弱侧空掉。

Fourth, defensive communication is lacking. On screens, the team does not call screen/switch/stay early enough, causing two defenders to guard one player or leaving the weak side open.

第五，关键时刻容易 hero ball。不是不能单打，而是连续单打、没有第二选择、没有冲板安排，这会让好球员也打成低效。

Fifth, late-game hero ball appears too often. Isolation is not always wrong, but consecutive isolations without second options or crash assignments make good players inefficient.

11. 失误分析

Turnover Analysis

传球失误：最常见问题是慢传、软传、角度消失后才传。解决方式是提前一拍传，或者简单 swing pass，不要等协防完全到位。

Passing turnovers: the common issue is slow passes, soft passes, and passing after the angle is gone. The fix is to pass one beat earlier or make a simple swing pass before help fully arrives.

运球失误：Sean 在压力下被断是明显反复问题。边线附近不能停球，不能横向运球找感觉，必须先用身体保护球。

Dribbling turnovers: Sean getting stripped under pressure is a repeated issue. He cannot pick up the ball near the sideline or dribble sideways for rhythm; body protection comes first.

决策失误：Akila 和 Yang 有时在协防已经站好时继续强攻。更好的选择是 kick-out 给 Willy，或给 James/Eaxin 中投点。

Decision turnovers: Akila and Yang sometimes keep attacking after help is set. The better choice is kick-out to Willy or midrange outlet to James/Eaxin.

无谓失误：Tiger 的失误问题更多来自节奏和选择，而不是对手压迫。对他来说，少持球、简单传、近框慢一点，是直接提升。

Unnecessary turnovers: Tiger's mistakes come more from timing and choice than opponent pressure. For him, less handling, simpler passes, and slower close finishes are direct upgrades.

最常见的三大失误来源：一是持球过久，二是传球慢/软，三是角色不清楚导致球员做了不适合自己的动作。

The three biggest turnover causes are: holding the ball too long, slow/soft passing, and unclear roles forcing players into actions that do not fit them.

12. 进攻打法分析

Offensive System Analysis

最有效打法：drive-and-kick + 弱侧冲板。Yang 或 Akila 攻击，Willy 站弱侧外线，James/Eaxin 中投接应，Chris 弱侧切，Akila/Chris 冲二次机会。

Most effective action: drive-and-kick plus weak-side crash. Yang or Akila attacks, Willy spaces weak side, James/Eaxin provide midrange outlets, Chris cuts weak side, and Akila/Chris crash second chances.

推荐一：4-out 1-in。James 掩护后可顺下或外弹中投；Willy 保持外线，Yang 主攻，Eaxin 接应，Akila 从弱侧冲板。

Recommendation 1: 4-out 1-in. James screens and can dive or pop to midrange; Willy keeps perimeter spacing, Yang attacks, Eaxin supports, and Akila crashes from the weak side.

推荐二：Horns 简化版。James 与 Eaxin 站双肘，给持球人 handoff、中投、back cut 选择，减少一上来乱运。

Recommendation 2: simplified Horns. James and Eaxin at the elbows give handoff, midrange, and back-cut options, reducing random dribbling to start possessions.

不适合：让 Willy 硬冲、让 Chris 当定点 shooter、让 Tiger 做复杂处理、让 Sean 长时间被压迫控球。

Bad fits: forcing Willy into contact drives, using Chris as a stationary shooter, making Tiger handle complex actions, or leaving Sean under pressure for long stretches.

13. 防守打法分析

Defensive System Analysis

基础防守建议半场人盯人。球队不适合长时间全场压迫，因为 Tiger 脚步慢，Willy 也不是身体压迫型。

Base defense should be half-court man-to-man. Long full-court pressure is not ideal because Tiger lacks foot speed and Willy is not a physical pressure defender.

挡拆防守必须统一语言：screen、switch、stay、help、box。没有声音就没有防守系统。

Pick-and-roll defense needs shared language: screen, switch, stay, help, box. Without voices, there is no defensive system.

遇到速度型后卫，Tiger 不适合主防；Yang/Eaxin/Chris 更适合轮流消耗。

Against quick guards, Tiger should not be the main defender; Yang/Eaxin/Chris fit better as rotating defenders.

篮板防守分工：James 先卡人，Akila/Chris 冲第二落点，Willy/Eaxin 收弱侧，Yang 准备转换。

Rebounding defense assignments: James makes first contact, Akila/Chris chase second bounces, Willy/Eaxin clean weak side, and Yang prepares transition.

14. Best Lineup 最佳阵容

Best Lineups

进攻最强：Yang / Willy / Eaxin / James / Akila。这个阵容有三分、中投、冲板、突破。风险是失误和防守沟通。

Best offense: Yang / Willy / Eaxin / James / Akila. This lineup has threes, midrange, crashing, and driving. Risk: turnovers and defensive communication.

防守最稳：Yang / Eaxin / Chris / James / Akila。牺牲一点三分，但补位、卡位、半场站位更好。

Most stable defense: Yang / Eaxin / Chris / James / Akila. It gives up some shooting but improves help, box-outs, and half-court positioning.

追分阵容：Yang / Willy / Sean / Akila / James。得分点最多，但 Sean 必须减少被断，Akila 必须减少冒险传球。

Comeback lineup: Yang / Willy / Sean / Akila / James. More scoring creation, but Sean must avoid strips and Akila must reduce risky passes.

速度阵容：Yang / Willy / Eaxin / Chris / Akila。适合打快和拉空间，但篮板第一身体接触会下降。

Speed lineup: Yang / Willy / Eaxin / Chris / Akila. Good for pace and space, but first-contact rebounding drops.

关键时刻阵容：根据需要选择 Willy 或 Chris。需要得分和 spacing 上 Willy；需要防守、切入、卡位上 Chris。

Closing lineup: choose Willy or Chris based on need. Use Willy for scoring and spacing; use Chris for defense, cutting, and box-outs.

15. 角色定位

Player Role Definition

Yang #23: 核心攻击手 + 三分牵制。适合持球攻击、转换、关键球；不适合连续无第二选择的 hero ball。

Yang #23: core attacker plus three-point gravity. Fits on-ball attack, transition, and key possessions; does not fit consecutive hero-ball with no second option.

Willy #26: shooter / floor spacer。适合底角和 45 度接球投；不适合硬冲和身体对抗型任务。

Willy #26: shooter / floor spacer. Fits corner and wing catch-and-shoot; not suited for force-contact tasks.

Akila #69/#88: 高产出高波动得分+进攻篮板点。适合冲板、二次进攻、简单攻击；不适合高风险组织。

Akila #69/#88: high-production, high-variance scorer and offensive rebounder. Fits crashing, second chances, and simple attacks; not high-risk creation.

James #25: 内线掩护、中投接应、篮板身体点。适合 pick-and-pop、short roll、卡位；不适合被迫外线追小后卫。

James #25: big screener, midrange outlet, rebound contact piece. Fits pick-and-pop, short roll, and box-outs; not suited to chasing small guards outside.

Eaxin #3: 稳定中投 connector。适合弱侧接应和低失误运转；需要更主动出手。

Eaxin #3: stable midrange connector. Fits weak-side outlets and low-turnover flow; needs more proactive shots.

Chris #16: 切入防守 wing，不是 shooter。适合补位、切入、卡位、回防；不要固定站底角等三分。

Chris #16: cutting/defense wing, not a shooter. Fits filling gaps, cutting, box-outs, and sprint-back defense; should not be parked in the corner waiting for threes.

Sean #1: 轮换控球组织。适合第二阵容控节奏；必须减少被断和 over-dribble。

Sean #1: rotation ball handler. Fits second-unit tempo control; must reduce strips and over-dribbling.

Tiger #11: 老将短轮换。适合慢节奏、简单球、站位提醒；不适合追快后卫和复杂处理球。

Tiger #11: veteran short-rotation player. Fits slower pace, simple plays, and positioning reminders; not suited for chasing quick guards or complex ball handling.

16. 沟通和态度分析

Communication and Mentality

球队态度总体不是问题，愿意拼、愿意跑、也愿意分享球。真正的问题是沟通不连续：一两个回合会喊，连续几个回合后声音就掉下去。

Team attitude is generally not the problem; players compete, run, and share the ball. The real issue is communication consistency: voices appear for a possession or two, then disappear.

防守端最应该固定的四句话：**screen**、**switch**、**help**、**box**。每个回合都喊，比偶尔喊十句更有用。

The four defensive calls that must become automatic: screen, switch, help, box. Calling them every possession matters more than occasionally yelling ten things.

失误后必须第一时间回防。抱怨和停顿会让一个失误变成四分差距。

After a turnover, sprint back immediately. Complaining or pausing turns one mistake into a four-point swing.

17. 训练建议

Training Plan

个人训练一：Akila 近框终结和低失误。练保护球、用板、身体挡人、冲板后二次起跳。

Individual 1: Akila close finishing and low-turnover play. Train ball protection, glass finishes, body shielding, and second jumps after crashes.

个人训练二：Willy/Yang catch-and-shoot 和 relocation。两人的三分不是随机武器，应该被战术制造。

Individual 2: Willy/Yang catch-and-shoot and relocation. Their threes are not random weapons; they should be created by the offense.

个人训练三：Sean 压力下控球保护。边线不死球，三秒内处理球。

Individual 3: Sean pressure ball security. No dead dribbles near the sideline; make a decision within three seconds.

团队训练一：5-out spacing + drive-and-kick。所有人知道自己站哪里、谁冲板、谁回防。

Team 1: 5-out spacing plus drive-and-kick. Everyone must know where to stand, who crashes, and who gets back.

团队训练二：挡拆沟通和篮板卡位。每次 screen 必须喊，每次投篮必须 box out。

Team 2: screen communication and rebounding. Every screen must be called; every shot must trigger box-out responsibility.

18. 下一场比赛调整

Next Game Adjustments

首发建议：Yang、Willy、Eaxin、James、Akila。这个组合最能体现球队主要武器：攻击、三分、中投、篮板、冲板。

Suggested starters: Yang, Willy, Eaxin, James, Akila. This group best represents the team weapons: attack, shooting, midrange, rebounding, and crashing.

Chris 是 swing piece，根据对手速度和防守需求进入主力或替补。Sean 作为替补控节奏，Tiger 只打合适 matchup。

Chris is the swing piece depending on opponent speed and defense needs. Sean controls tempo off the bench, and Tiger plays only suitable matchups.

进攻重点：先拉开，再攻击。Willy 和 Yang 必须有明确三分机会；James/Eaxin 必须提供中投接应；Akila 保留冲板但减少冒险传球。

Offensive focus: space first, then attack. Willy and Yang need clear three-point looks; James/Eaxin must provide midrange outlets; Akila keeps crashing but reduces risky passes.

防守重点：挡拆必须喊，回防必须 sprint，篮板必须先卡人。下一场失误目标：12 次以内。

Defensive focus: call screens, sprint back, and hit first contact on rebounds. Next-game turnover target: under 12.

19. 队内总结

Team Message to Send

我们有能力赢球。8 场数据证明，我们有得分点、有三分、有中投、有冲板，不是没有天赋。

We have the ability to win. Eight games of data show that we have scorers, shooting, midrange, and crashing. This is not a talent problem.

真正要改的是回合质量。少乱运、少慢传、少无谓失误、少关键时刻连续单打。

What must improve is possession quality: less loose dribbling, fewer slow passes, fewer unnecessary turnovers, and fewer consecutive isolations late.

每个人只做最适合自己的事，球队就会变强：Yang 攻击和牵制，Willy 投，Akila 得分冲板但降失误，James/Eaxin 中投接应，Chris 切入防守，Sean 保护球组织，Tiger 简单化。

The team gets better when everyone does the right job: Yang attacks and creates gravity, Willy shoots, Akila scores/crashes while reducing turnovers, James/Eaxin provide midrange outlets, Chris cuts/defends, Sean protects the ball and organizes, Tiger simplifies.

下一场目标：失误 12 次以内；每个人卡位；每个挡拆都喊；Yang/Willy 合计至少 8 个干净三分机会；关键时刻不连续 hero ball。

Next-game goals: turnovers under 12; everyone boxes out; every screen is called; Yang/Willy get at least 8 clean combined three-point looks; no consecutive hero-ball late.

20. Game-by-Game Score Sheet Review

逐场记分表复盘

以下每场只使用记分表可确认的得分，并结合视频趋势给出教练判断。
The following pages use score-sheet-confirmed scoring and combine it with video tendencies for coach judgment.

vs Pirates - L 47-49

vs Pirates - L 47-49

Player 球员	PTS 得分	3PM 三分
Yang #23	19	3
Sean #1	9	1
Willy #26	5	1
Akila #69/#88	4	0
Eaxin #3	4	0
James #25	2	0
Chris #16	2	0
Tiger #11	2	0

这场分差很小，说明不是能力输，而是细节输。Yang 高分，但其他主力火力不足，Akila 只有 4 分，Willy 只有 5 分，进攻点太集中。

The margin was tiny, so this was not a talent loss; it was a detail loss. Yang scored well, but other main weapons were quiet: Akila had 4 and Willy had 5, so offense was too concentrated.

教练判断：这场的核心不是只看谁得分最高，而是看得分结构是否健康。健康结构是：Yang/Willy 有牵制，Akila 冲板得分，James/Eaxin 接应，其他人少失误。

Coach judgment: the key is not only who scored most, but whether the scoring structure was healthy. A healthy structure means Yang/Willy create gravity, Akila scores and crashes, James/Eaxin provide outlets, and everyone else limits turnovers.

vs Spartans - W 53-47

vs Spartans - W 53-47

Player 球员	PTS 得分	3PM 三分
Akila #69/#88	16	0
Yang #23	11	3
Willy #26	11	3
Sean #1	7	1
Eaxin #3	4	0
Chris #16	4	0
James #25	0	0
Tiger #11	0	0

这场赢球更像团队模式：Akila 16，Yang/Willy 各 11，Sean/Chris/Eaxin 都有补分。不是一个人硬扛。
This win looked more like a team model: Akila 16, Yang/Willy 11 each, and Sean/Chris/Eaxin all added points. It was not one player carrying everything.

教练判断：这场的核心不是只看谁得分最高，而是看得分结构是否健康。健康结构是：Yang/Willy 有牵制，Akila 冲板得分，James/Eaxin 接应，其他人少失误。
Coach judgment: the key is not only who scored most, but whether the scoring structure was healthy. A healthy structure means Yang/Willy create gravity, Akila scores and crashes, James/Eaxin provide outlets, and everyone else limits turnovers.

vs Kings - W 80-68

vs Kings - W 80-68

Player 球员	PTS 得分	3PM 三分
Akila #69/#88	20	0
Willy #26	20	6
Yang #23	16	4
Sean #1	10	0
Eaxin #3	10	1
James #25	2	0
Tiger #11	2	0
Chris #16	0	0

这是进攻样板。80 分说明 spacing 和多点开花都出来了。Akila/Willy 高产，Yang 也保持牵制，Sean/Eaxin 都有贡献。
This is the offensive template. Scoring 80 shows spacing and multi-source production. Akila/Willy produced, Yang maintained gravity, and Sean/Eaxin contributed.

教练判断：这场的核心不是只看谁得分最高，而是看得分结构是否健康。健康结构是：Yang/Willy 有牵制，Akila 冲板得分，James/Eaxin 接应，其他人少失误。
Coach judgment: the key is not only who scored most, but whether the scoring structure was healthy. A healthy structure means Yang/Willy create gravity, Akila scores and crashes, James/Eaxin provide outlets, and everyone else limits turnovers.

vs Eagles - L 55-66

vs Eagles - L 55-66

Player 球员	PTS 得分	3PM 三分
Akila #69/#88	18	1
Willy #26	13	2
Yang #23	11	3
Sean #1	6	0
Chris #16	3	0
Eaxin #3	2	0
Tiger #11	2	0
James #25	0	0

得 55 分并不算完全低，但丢 66 分说明防守失败。Akila/Willy/Yang 都有分，问题更偏防守、回防和轮转。
Scoring 55 was not a total collapse, but allowing 66 shows a defensive failure. Akila/Willy/Yang all scored; the problem was more defense, transition recovery, and rotations.

教练判断：这场的核心不是只看谁得分最高，而是看得分结构是否健康。健康结构是：Yang/Willy 有牵制，Akila 冲板得分，James/Eaxin 接应，其他人少失误。
Coach judgment: the key is not only who scored most, but whether the scoring structure was healthy. A healthy structure means Yang/Willy create gravity, Akila scores and crashes, James/Eaxin provide outlets, and everyone else limits turnovers.

vs Generals - W 47-43

vs Generals - W 47-43

Player 球员	PTS 得分	3PM 三分
Yang #23	15	1
Willy #26	10	2
Akila #69/#88	8	0
Sean #1	8	1
Eaxin #3	6	0
James #25	0	0
Chris #16	0	0
Tiger #11	0	0

低比分赢球，说明球队能打硬仗。但 47 分也说明半场进攻容易停住，必须增加 easy points 和 clean threes。
A low-scoring win shows the team can grind, but 47 points also shows half-court offense can stall. More easy points and clean threes are needed.

教练判断：这场的核心不是只看谁得分最高，而是看得分结构是否健康。健康结构是：Yang/Willy 有牵制，Akila 冲板得分，James/Eaxin 接应，其他人少失误。
Coach judgment: the key is not only who scored most, but whether the scoring structure was healthy. A healthy structure means Yang/Willy create gravity, Akila scores and crashes, James/Eaxin provide outlets, and everyone else limits turnovers.

vs Tigers - W 50-41

vs Tigers - W 50-41

Player 球员	PTS 得分	3PM 三分
Akila #69/#88	19	0
Yang #23	11	2
Willy #26	8	2
Eaxin #3	5	1
James #25	4	0
Sean #1	2	0
Chris #16	1	0
Tiger #11	0	0

防守表现不错，只让对手 41 分。Akila 19 分撑住进攻，Yang/Willy 提供外线和攻击。
Good defensive result, holding the opponent to 41. Akila’ s 19 carried offense, while Yang/Willy supplied pressure and spacing.

教练判断：这场的核心不是只看谁得分最高，而是看得分结构是否健康。健康结构是：Yang/Willy 有牵制，Akila 冲板得分，James/Eaxin 接应，其他人少失误。
Coach judgment: the key is not only who scored most, but whether the scoring structure was healthy. A healthy structure means Yang/Willy create gravity, Akila scores and crashes, James/Eaxin provide outlets, and everyone else limits turnovers.

vs Wolves - W 71-46

vs Wolves - W 71-46

Player 球员	PTS 得分	3PM 三分
Akila #69/#88	25	0
Yang #23	19	5
Sean #1	11	2
Willy #26	8	2
James #25	6	0
Eaxin #3	2	0
Chris #16	0	0
Tiger #11	0	0

这场是最强样本之一，71-46。Akila 25 和 Yang 19 拉开差距，说明当主攻点效率高时球队上限不低。
One of the strongest samples: 71-46. Akila 25 and Yang 19 separated the game, showing the team ceiling when top options are efficient.

教练判断：这场的核心不是只看谁得分最高，而是看得分结构是否健康。健康结构是：Yang/Willy 有牵制，Akila 冲板得分，James/Eaxin 接应，其他人少失误。
Coach judgment: the key is not only who scored most, but whether the scoring structure was healthy. A healthy structure means Yang/Willy create gravity, Akila scores and crashes, James/Eaxin provide outlets, and everyone else limits turnovers.

vs Cardinals - W 61-54

vs Cardinals - W 61-54

Player 球员	PTS 得分	3PM 三分
Willy #26	18	6
Sean #1	17	3
Akila #69/#88	9	0
James #25	9	0
Yang #23	6	2
Eaxin #3	2	0
Chris #16	0	0
Tiger #11	0	0

这场 Willy 18、Sean 17，说明当 Yang 低分时球队仍能靠其他人赢球。Yang 的分不高，但外线牵制仍会影响防守。
Willy 18 and Sean 17 show the team can win even when Yang has a lower scoring night. Yang’ s scoring was low, but his perimeter gravity still affects the defense.

教练判断：这场的核心不是只看谁得分最高，而是看得分结构是否健康。健康结构是：Yang/Willy 有牵制，Akila 冲板得分，James/Eaxin 接应，其他人少失误。
Coach judgment: the key is not only who scored most, but whether the scoring structure was healthy. A healthy structure means Yang/Willy create gravity, Akila scores and crashes, James/Eaxin provide outlets, and everyone else limits turnovers.

21. Individual Player Reports

八位球员个人报告

以下为每位球员的更新版判断。重点不是好听，而是可执行：每个人都要知道自己能帮助球队什么，以及什么正在伤害球队。

These are updated individual evaluations. The goal is not to sound nice; it is to be actionable: every player must know how he helps the team and what is hurting the team.

球员：Yang #23

Player: Yang #23

定位：主力核心攻击点 / 三分牵制点 / 转换进攻发动点
Role: Core attacking option / three-point gravity piece / transition pressure creator

8 场 108 分，场均 13.5，记录三分 23 个。即使某场得分不高，他的防守牵制力仍然存在：对手必须靠近他，不能随便收缩。
108 points in 8 games, 13.5 PPG, 23 recorded made threes. Even in lower-scoring games, his gravity remains: defenders must stay attached and cannot freely collapse.

Data point 数据项	Value 数值
Total points 总分	108
PPG 场均	13.5
Game high 单场最高	19
Recorded 3PM 三分命中	23
Team scoring share 得分占比	23.3%
Recorded REB range 篮板记录范围	40-45
Recorded AST range 助攻记录范围	15-20
Recorded STL range 抢断记录范围	8-12
Recorded BLK range 盖帽记录范围	1-2

直接评价：如果他只发挥优点，球队明显变好；如果他的坏习惯连续出现，球队回合质量会马上下降。
Direct evaluation: when he stays inside his strengths, the team clearly improves; when his bad habits repeat, possession quality drops immediately.

Yang #23 - 优点与问题

Yang #23 - Strengths and Problems

优点 / Strengths

- 三分威胁是真实战术价值，不只是数据。
His three-point threat is a real tactical asset, not just a stat.
- 突破和转换能快速制造防守收缩。
His drives and transition attacks force defensive collapse quickly.
- 关键时刻有能力连续得分，是球队少数能改变 momentum 的人。
He can score in bursts and is one of the few players who can change momentum.

问题 / Problems

- 强攻多时会把好回合变成低质量出手。
When he forces attacks, good possessions become low-quality shots.
- 看到协防已经站好时，出球要更早。
When help is already set, he must pass earlier.
- 防守专注度必须跟进攻责任匹配。
His defensive focus must match his offensive role.

Yang #23 - 使用方式与评分

Yang #23 - Usage and Rating

如何使用 / How to Use

主攻点，但不能每球都自己终结。
Primary attack point, but not every possession must end with his own shot.

多用他吸引协防，给 Willy 外线、James/Eaxin 中投、Akila 冲板。
Use his gravity to create Willy threes, James/Eaxin midrange, and Akila crashes.

关键时刻允许他处理球，但必须有第二选择。
He can handle late-game possessions, but there must be a second option.

Category 项目	Score 评分
Scoring	8.0
Three-point gravity	8.5
Decision-making	6.5
Defense	6.5
Overall	7.8

评分不是为了排名羞辱谁，而是为了说明角色价值和改进优先级。高分不代表没问题，低分也不代表没用。
The rating is not for shaming or ranking. It explains role value and development priorities. A high score does not mean no problems; a low score does not mean no value.

球员：Willy #26

Player: Willy #26

定位：主力 shooter / floor spacer / 弱侧三分点
Role: Starting shooter / floor spacer / weak-side three-point option

8 场 93 分，场均 11.6，记录三分 24 个，队内第一。他的核心不是身体，而是投射和拉开空间。
93 points in 8 games, 11.6 PPG, team-high 24 recorded made threes. His core value is not physicality; it is shooting and spacing.

Data point 数据项	Value 数值
Total points 总分	93
PPG 场均	11.6
Game high 单场最高	20
Recorded 3PM 三分命中	24
Team scoring share 得分占比	20.0%
Recorded REB range 篮板记录范围	18-24
Recorded AST range 助攻记录范围	10-14
Recorded STL range 抢断记录范围	8-12
Recorded BLK range 盖帽记录范围	0-1

直接评价：如果他只发挥优点，球队明显变好；如果他的坏习惯连续出现，球队回合质量会马上下降。
Direct evaluation: when he stays inside his strengths, the team clearly improves; when his bad habits repeat, possession quality drops immediately.

Willy #26 - 优点与问题

Willy #26 - Strengths and Problems

优点 / Strengths

- 底角和 45 度能给持球人创造突破空间。**
From corner and wing spots, he creates driving space for ball handlers.
- catch-and-shoot 果断时，球队进攻立刻变简单。**
When he catches and shoots decisively, the offense becomes simpler.
- 他和 Yang 的双三分威胁是球队 spacing 核心。**
His paired shooting gravity with Yang is the core of team spacing.

问题 / Problems

- 不能把他当身体型球员用，硬冲硬抗不是他的工作。**
He should not be used as a physical player; force-contact drives are not his job.
- 接球犹豫会直接浪费他的最大价值。**
Catch hesitation wastes his best value.
- 防守端要更早站位，不然投进球也会被对手还回来。**
He needs earlier defensive positioning or made shots get cancelled by opponent scores.

Willy #26 - 使用方式与评分

Willy #26 - Usage and Rating

如何使用 / How to Use

每场设计 3-5 次明确三分机会。
Design 3-5 clear three-point chances per game.

少运球，多 relocate，多接球即投。
Dribble less, relocate more, shoot on the catch.

作为追分阵容必上球员。
He belongs in comeback lineups.

Category 项目	Score 评分
Shooting	8.5
Scoring	7.4
Spacing value	8.3
Defense	5.8
Overall	7.4

评分不是为了排名羞辱谁，而是为了说明角色价值和改进优先级。高分不代表没问题，低分也不代表没用。
The rating is not for shaming or ranking. It explains role value and development priorities. A high score does not mean no problems; a low score does not mean no value.

球员：Akila #69 / #88

Player: Akila #69 / #88

定位：主力高产出高波动球员 / 得分与进攻篮板点 / 失误风险点
Role: Starter-level high-production, high-variance player / scorer and offensive rebounder / turnover risk

8 场 119 分，场均 14.9，队内总得分第一。这个数据必须尊重：他能得分、能冲进攻篮板、能制造额外回合。但问题也必须保留：失误多、上篮不稳、投篮不稳。
119 points in 8 games, 14.9 PPG, first on the team in total scoring. That production must be respected: he scores, crashes offensive rebounds, and creates extra possessions. The problems also remain: turnovers, unstable layups, and inconsistent shooting.

Data point 数据项	Value 数值
Total points 总分	119
PPG 场均	14.9
Game high 单场最高	25
Recorded 3PM 三分命中	1
Team scoring share 得分占比	25.6%
Recorded REB range 篮板记录范围	45-50
Recorded AST range 助攻记录范围	15-20
Recorded STL range 抢断记录范围	10-14
Recorded BLK range 盖帽记录范围	1-2

直接评价：如果他只发挥优点，球队明显变好；如果他的坏习惯连续出现，球队回合质量会马上下降。
Direct evaluation: when he stays inside his strengths, the team clearly improves; when his bad habits repeat, possession quality drops immediately.

Akila #69 / #88 - 优点与问题

Akila #69 / #88 - Strengths and Problems

优点 / Strengths

- 得分产量是真实存在的，不是偶然。
The scoring production is real, not accidental.
- 进攻篮板和 second chance 是他最重要的隐藏价值。
Offensive rebounding and second chances are his most important hidden value.
- 从弱侧冲板、顺势攻击，比长时间持球创造更有效。
Weak-side crashing and flow attacks are more effective than long self-creation stretches.

问题 / Problems

- 不能因为得分高就忽略失误；他的失误会直接改变比赛走势。
High scoring cannot hide turnovers; his mistakes can directly swing games.
- 上篮不稳定，easy points 丢掉会非常伤。
Layup inconsistency hurts because easy points must be converted.
- 投篮不稳定，所以要减少勉强投和节奏外出手。
The jumper is inconsistent, so forced and off-rhythm shots must drop.

Akila #69 / #88 - 使用方式与评分

Akila #69 / #88 - Usage and Rating

如何使用 / How to Use

保留他冲板和得分，但限制高风险传球。
Keep his crashing and scoring, but limit high-risk passes.

让他更多从 weak-side cut、offensive rebound、transition follow-up 得分。
Use him more through weak-side cuts, offensive rebounds, and transition follow-ups.

关键时刻可以上，但前提是简单处理球。
He can close games if he keeps decisions simple.

Category 项目	Score 评分
Scoring	8.2
Offensive rebounding	8.0
Ball security	5.0
Finishing consistency	5.8
Overall	7.6

评分不是为了排名羞辱谁，而是为了说明角色价值和改进优先级。高分不代表没问题，低分也不代表没用。
The rating is not for shaming or ranking. It explains role value and development priorities. A high score does not mean no problems; a low score does not mean no value.

球员：Sean #1

Player: Sean #1

定位：轮换控球 / 替补组织点 / 高压控球风险点
Role: Rotation ball handler / bench organizer / pressure ball-security risk

8 场 70 分，场均 8.8。得分贡献不低，也有组织价值；但视频里带球被断、边线停球、over-dribble 是反复问题。
70 points in 8 games, 8.8 PPG. He contributes scoring and organization, but video repeatedly shows strips, sideline pickups, and over-dribbling.

Data point 数据项	Value 数值
Total points 总分	70
PPG 场均	8.8
Game high 单场最高	17
Recorded 3PM 三分命中	8
Team scoring share 得分占比	15.1%
Recorded REB range 篮板记录范围	30-38
Recorded AST range 助攻记录范围	8-12
Recorded STL range 抢断记录范围	6-10
Recorded BLK range 盖帽记录范围	2-3

直接评价：如果他只发挥优点，球队明显变好；如果他的坏习惯连续出现，球队回合质量会马上下降。
Direct evaluation: when he stays inside his strengths, the team clearly improves; when his bad habits repeat, possession quality drops immediately.

Sean #1 - 优点与问题

Sean #1 - Strengths and Problems

优点 / Strengths

能把半场进攻带进结构。

Can bring half-court offense into structure.

有一定投篮和突破补分能力。

Can add points through shooting and driving.

适合第二阵容控节奏。

Fits as a second-unit tempo controller.

问题 / Problems

带球经常被断，这是他的最大风险。

Getting stripped is his biggest risk.

持球太久会拖慢进攻，也让自己进入危险区域。

Holding the ball too long slows the offense and puts him in danger areas.

被贴防时需要先保球，不是先找动作。

Against pressure, he must protect the ball first, not search for moves.

Sean #1 - 使用方式与评分

Sean #1 - Usage and Rating

如何使用 / How to Use

用他组织，但必须设定三秒决策规则。
Use him to organize, but set a three-second decision rule.

压力强的对手面前少让他长时间控。
Against strong pressure, reduce long ball-handling stretches.

适合作为替补节奏点，不一定每场必须收比赛。
Best as a bench tempo piece; he does not have to close every game.

Category 项目	Score 评分
Organization	7.0
Scoring	6.7
Ball security	5.0
Defense	6.0
Overall	6.6

评分不是为了排名羞辱谁，而是为了说明角色价值和改进优先级。高分不代表没问题，低分也不代表没用。
The rating is not for shaming or ranking. It explains role value and development priorities. A high score does not mean no problems; a low score does not mean no value.

球员：Eaxin #3

Player: Eaxin #3

定位：主力稳定点 / 中投选择 / 低失误体系球员
Role: Starter-level stabilizer / midrange option / low-turnover system player

8 场 35 分，场均 4.4。得分不高，但他有中投和稳定性，应该更主动把这两点变成球队武器。
35 points in 8 games, 4.4 PPG. The volume is low, but he has midrange value and stability; he should turn those into team weapons more actively.

Data point 数据项	Value 数值
Total points 总分	35
PPG 场均	4.4
Game high 单场最高	10
Recorded 3PM 三分命中	2
Team scoring share 得分占比	7.5%
Recorded REB range 篮板记录范围	18-24
Recorded AST range 助攻记录范围	4-8
Recorded STL range 抢断记录范围	6-10
Recorded BLK range 盖帽记录范围	0-1

直接评价：如果他只发挥优点，球队明显变好；如果他的坏习惯连续出现，球队回合质量会马上下降。
Direct evaluation: when he stays inside his strengths, the team clearly improves; when his bad habits repeat, possession quality drops immediately.

Eaxin #3 - 优点与问题

Eaxin #3 - Strengths and Problems

优点 / Strengths

中距离可以惩罚收缩防守。

His midrange can punish collapsing defenses.

不乱打，回合破坏性低。

He does not force much and rarely destroys possessions.

适合 weak-side connector。

Fits as a weak-side connector.

问题 / Problems

存在感偏低，有时候太安全。

His presence is too low and sometimes too safe.

应该更主动要球和出手中投。

He should demand the ball and take midrange shots more proactively.

防守沟通声音还不够。

Defensive communication is not loud enough.

Eaxin #3 - 使用方式与评分

Eaxin #3 - Usage and Rating

如何使用 / How to Use

主力阵容中稳定 spacing 和中投接应。
Use him to stabilize spacing and midrange outlets in the main lineup.

每场至少要有主动进攻选择。
He should have at least some proactive offensive choices each game.

防守端需要成为 switch/box out 的声音。
He needs to be a voice for switch and box-out calls.

Category 项目	Score 评分
Stability	7.2
Midrange	6.8
Scoring volume	5.0
Defense	6.5
Overall	6.6

评分不是为了排名羞辱谁，而是为了说明角色价值和改进优先级。高分不代表没问题，低分也不代表没用。
The rating is not for shaming or ranking. It explains role value and development priorities. A high score does not mean no problems; a low score does not mean no value.

球员：James #25

Player: James #25

定位：主力内线 / 掩护者 / 篮板点 / 中投补充点
Role: Starting big / screener / rebounder / midrange release option

8 场 23 分，场均 2.9。得分低，但不能用得分否定他；James 的价值在掩护、篮板、身体接触和中投接应。
23 points in 8 games, 2.9 PPG. Low scoring does not erase his value; James matters through screens, rebounding, first contact, and midrange release options.

Data point 数据项	Value 数值
Total points 总分	23
PPG 场均	2.9
Game high 单场最高	9
Recorded 3PM 三分命中	0
Team scoring share 得分占比	5.0%
Recorded REB range 篮板记录范围	18-24

Recorded STL range 抢断记录范围	3-6
Recorded BLK range 盖帽记录范围	1-2

直接评价：如果他只发挥优点，球队明显变好；如果他的坏习惯连续出现，球队回合质量会马上下降。
Direct evaluation: when he stays inside his strengths, the team clearly improves; when his bad habits repeat, possession quality drops immediately.

James #25 - 优点与问题

James #25 - Strengths and Problems

优点 / Strengths

- 中投可以被更多使用。
His midrange should be used more.
- 掩护能帮 Yang/Willy/Sean/Akila 创造第一步优势。
His screens help Yang/Willy/Sean/Akila create first-step advantages.
- 篮板和第一身体接触是基础价值。
Rebounding and first contact are base values.

问题 / Problems

- 快节奏对手会考验他的回防和横移。
Fast opponents test his transition recovery and lateral movement.
- 站太深会堵住持球人的突破路线。
Standing too deep crowds driving lanes.
- 需要更积极追第二落点。
He needs to pursue second bounces more aggressively.

James #25 - 使用方式与评分

James #25 - Usage and Rating

如何使用 / How to Use

pick-and-pop 中投，比每次顺下更适合。
Pick-and-pop midrange can fit better than diving every time.

做掩护后要给持球人留出路线。
After screening, he must keep lanes open for the ball handler.

篮板任务：先卡人，再找球。
Rebounding task: hit first contact, then find the ball.

Category 项目	Score 评分
Screening	7.0
Rebounding	6.8
Midrange	6.6
Mobility	5.5
Overall	6.5

评分不是为了排名羞辱谁，而是为了说明角色价值和改进优先级。高分不代表没问题，低分也不代表没用。
The rating is not for shaming or ranking. It explains role value and development priorities. A high score does not mean no problems; a low score does not mean no value.

球员：Chris #16

Player: Chris #16

定位：主力/替补摇摆位 / 切入防守型 wing，不是 shooter 定位
Role: Starter/bench swing wing / cutting-defense wing, not a shooter label

8 场 10 分，场均 1.2。Chris 不能被定义成 shooter；他的正确价值应该来自切入、防守、补位、弱侧移动和二次机会。
10 points in 8 games, 1.2 PPG. Chris should not be labeled a shooter; his value should come from cutting, defense, filling gaps, weak-side movement, and second actions.

Data point 数据项	Value 数值
Total points 总分	10
PPG 场均	1.2
Game high 单场最高	4
Recorded 3PM 三分命中	0
Team scoring share 得分占比	2.2%
Recorded REB range 篮板记录范围	15-22

Recorded STL range 抢断记录范围	4-8
Recorded BLK range 盖帽记录范围	0-1

直接评价：如果他只发挥优点，球队明显变好；如果他的坏习惯连续出现，球队回合质量会马上下降。
Direct evaluation: when he stays inside his strengths, the team clearly improves; when his bad habits repeat, possession quality drops immediately.

Chris #16 - 优点与问题

Chris #16 - Strengths and Problems

优点 / Strengths

- 能做脏活，适合弱侧补位。
Can do dirty work and weak-side coverage.
- 如果主动切，会让进攻更立体。
If he cuts actively, the offense becomes more layered.
- 可以作为防守轮转拼图。
Can be a defensive rotation piece.

问题 / Problems

- 进攻存在感太低，不能只站着等球。
Offensive presence is too low; he cannot just stand and wait.
- 不是 shooter 定位，站底角等三分会误用他。
He is not a shooter role; parking him in the corner misuses him.
- 沟通需要更大声。
Communication must be louder.

Chris #16 - 使用方式与评分

Chris #16 - Usage and Rating

如何使用 / How to Use

- 打切入、回防、卡位、补位。**

Use him for cutting, sprint-back defense, box-outs, and help coverage.
- 替补或主力都可以，但必须有明确任务。**

Can start or come off the bench, but the task must be clear.
- 不要把进攻价值完全绑定在三分上。**

Do not tie his offensive value to threes.

Category 项目	Score 评分
Cutting/dirty work	6.5
Scoring volume	4.0
Defense	6.2
Spacing	4.8
Overall	5.8

评分不是为了排名羞辱谁，而是为了说明角色价值和改进优先级。高分不代表没问题，低分也不代表没用。

The rating is not for shaming or ranking. It explains role value and development priorities. A high score does not mean no problems; a low score does not mean no value.

球员：Tiger #11

Player: Tiger #11

定位：老将型短轮换 / 慢节奏 matchup minutes / 简单球角色
Role: Veteran short-rotation player / slow-pace matchup minutes / simple-play role

8 场 6 分，场均 0.8。他不是 high energy，也不是速度型防守人；更适合短时间、慢节奏、明确功能的老将轮换。
6 points in 8 games, 0.8 PPG. He is not a high-energy or speed defender; he fits short, slower, clearly defined veteran minutes.

Data point 数据项	Value 数值
Total points 总分	6
PPG 场均	0.8
Game high 单场最高	2
Recorded 3PM 三分命中	0
Team scoring share 得分占比	1.3%
Recorded REB range 篮板记录范围	12-20

Recorded STL range 抢断记录范围	2-5
Recorded BLK range 盖帽记录范围	0

直接评价：如果他只发挥优点，球队明显变好；如果他的坏习惯连续出现，球队回合质量会马上下降。
Direct evaluation: when he stays inside his strengths, the team clearly improves; when his bad habits repeat, possession quality drops immediately.

Tiger #11 - 优点与问题

Tiger #11 - Strengths and Problems

优点 / Strengths

慢节奏下可以用站位和经验参与。

In slower pace, he can contribute through positioning and experience.

如果只做简单选择，失误风险会下降。

If he makes only simple choices, turnover risk drops.

适合提醒和半场站位，不适合追速度。

Fits reminders and half-court positioning, not chasing speed.

问题 / Problems

速度和脚步已经影响防守适配。

Speed and footwork affect defensive fit.

无谓失误多，很多不是被迫，是选择问题。

Too many unnecessary turnovers, often choice-based rather than forced.

篮下放枪伤害大，因为这些是必须拿下的 **easy points**。

Missed close finishes hurt because those are must-have points.

Tiger #11 - 使用方式与评分

Tiger #11 - Usage and Rating

如何使用 / How to Use

只打合适 matchup，不追快后卫。
Use only suitable matchups; do not ask him to chase quick guards.

少持球，少复杂处理。
Handle less and avoid complex decisions.

篮下终结必须简单、慢一点、用板。
Close finishes must be simple, slower, and off the glass.

Category 项目	Score 评分
Experience	6.0
Speed/defensive range	4.0
Finishing	4.2
Turnover control	4.5
Overall	4.8

评分不是为了排名羞辱谁，而是为了说明角色价值和改进优先级。高分不代表没问题，低分也不代表没用。
The rating is not for shaming or ranking. It explains role value and development priorities. A high score does not mean no problems; a low score does not mean no value.

22. Score Sheet 深度分析

Deep Score Sheet Analysis

得分榜显示，Akila 是总得分第一，但这不自动等于“最稳”。他的价值来自产量和冲板，扣分来自失误和不稳定终结。正确结论是：高价值，但必须降波动。 The scoring leaderboard shows Akila first in total points, but that does not automatically mean “most reliable.” His value comes from production and crashing; the deductions come from turnovers and inconsistent finishing. Correct conclusion: high value, but volatility must come down.
Yang 是第二得分点，同时是最高级别的牵制点之一。即使他某场得分低，防守仍然不能放他，这种 gravity 会让队友得到空间。 Yang is the second scorer and one of the team’s highest-gravity players. Even in low-scoring games, defenses cannot ignore him; that gravity creates space for teammates.
Willy 的三分数据明确说明，他应该被当作 shooter 使用。不是每个球员都需要硬冲，Willy 的正确工作就是让防守不敢收缩。 Willy’s made-three data clearly says he should be used as a shooter. Not every player needs to force drives; his correct job is to make defenses afraid to collapse.
Sean 的得分并不低，但视频里的被断问题让他的价值有风险。对他来说，最重要的进步不是多得几分，而是少送几次反击。 Sean’s scoring is not low, but his strip risk on film makes his value risky. For him, the biggest improvement is not scoring more; it is giving away fewer fast breaks.
Chris、Tiger 的低得分不是问题本身，问题是他们必须用别的方式抵消低产量：防守、卡位、切入、简单球。如果低得分还伴随失误，那阵容价值会下降。 Low scoring from Chris and Tiger is not the issue by itself. They must offset low volume through defense, box-outs, cuts, and simple plays. If low scoring comes with turnovers, lineup value drops.

23. Score Sheet Appendix

记分表附录

以下为本报告使用的记分表来源图。图像只作为来源复核，不代表所有助攻/篮板/抢断/盖帽都记录完整。
The following are the source score-sheet images used for this report. They are source references only and do not mean all assists/rebounds/steals/blocks were fully recorded.
